

Resolution Number 473

A Resolution of the City Council of the City of North Bonneville Washington, Adopting a Greenhouse Gas Reduction Policy

Whereas, the City Council finds many local governments are reducing the production of pollutants through programs that provide economic and quality of life benefits intended to reduce energy bills, preserve green space, improve air quality, promote transportation choices, and sponsor economic development through energy conservation and creation of new energy sources; and

Whereas, the City Council finds the people of the City of North Bonneville will gain from policies and procedures that benefit its natural resources and reduce greenhouse gas emissions; and

Whereas, the various funding authorities have made adoption of a greenhouse reduction policy a prerequisite to application submittal;

Now, Therefore, it is hereby resolved by the City Council of the City of North Bonneville, Washington, that the following policies and procedures are adopted:

All new publicly funded buildings should include cost-effective, energy-efficient design;

All existing public buildings should be retrofitted with energy efficient applications as opportunity and funding allow;

City employees are encouraged to employ conservation measures;

The City's lighting system should be upgraded with energy efficient technology;

The City should pursue recycling as part of its solid waste strategy;

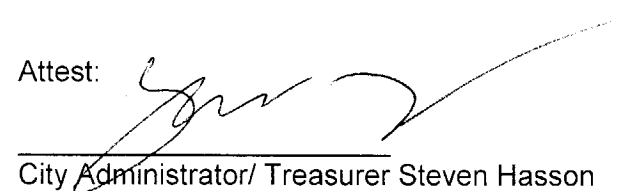

The City should maintain a water conservation program.

Passed this 13th day of May, 2014

Mayor Don Stevens
