Bryan, I tried my contact in Washington for Flygt he says he wont be able to help me, so I call Dave at Flygt to see if my cost would be better then what you were quoted and I can't beat the costing you were quoted. So I called Jerry at triangle to get my cost on parts to rebuild the existing pumps you have and here are my prices to rebuild the pumps with following parts, (1) O-ring kit, (1) wear ring, (1) upper bearing, (1) lower bearing, (1) cartridge seal, (1) impeller, (1) impeller bolt, (1) impeller washer, (1) impeller key. If we are able to come up and look at pumps we can see if there would be any more required or not . Rebuild cost \$7,300.00 each pump. If you have any questions please call. We are going to be closed on this Friday

*Thanks, Larry*
