Unfinished Business:

- **2022 Budget Discussion, 2022 budget draft review:** Mayor Sabo shares that the city finally was approved for the insurance claim on the pump damaged during the beginning of Covid. After the deductible of 10k is paid, the city will receive around \$13k reimbursement. He says the money received from that can go towards the purchase of the other pump at that station. R. Hall asks about the revenue summary miscellaneous categories and Sabo responds that they are for anything that doesn't fall into a more specific category within each fund. He then asks about equipment interfund charges, to which Sabo explains that there is a monthly transfer done essentially charging each department for equipment use. Mayor Sabo also explains that departments are directed to limit spending until May when the city receives the first portion of property tax payments to come in.
